

# Bridging the Gap

Spanning the distance between teaching,  
learning and application of systems  
thinking in the workplace

Rupesh Shah, Elaine Wedlock  
and Martin Reynolds

# Open University Systems Learning

- History of Undergraduate systems modules
- Post-graduate modules Systems Thinking since 2010
- OU Teaching and Learning:
  - Distance    Part-time    Supported
- 2 taught modules, plus optional and research modules
- Towards Diploma or Masters in Systems Thinking in Practice – orientation towards professional application
- 80 to 100 students on each module at a time
- Team of 4-5 tutors

# Project Outline

3 phases of research (c.18 months)

**Phase 1**  
Understanding  
students experience of  
**learning** during  
module

**Phase 2**  
Understanding  
experience of  
**applying** ideas in  
workplace

**Phase 3**  
Designing learning for  
application of systems  
ideas

**Plus informally**  
Checking in with  
our experiences as  
tutors

# Student's experience of learning

2 Why is today so like yesterday? > Useful metaphor: the garden and the ...

← Previous: Picturing the cognitive niche

**Useful metaphor: the garden and the wilderness**

The series of examples you have just looked at illustrate the tendency to create local worlds (Figure P2.23), where you feel in control. That is why, all being well, your world (your niche)

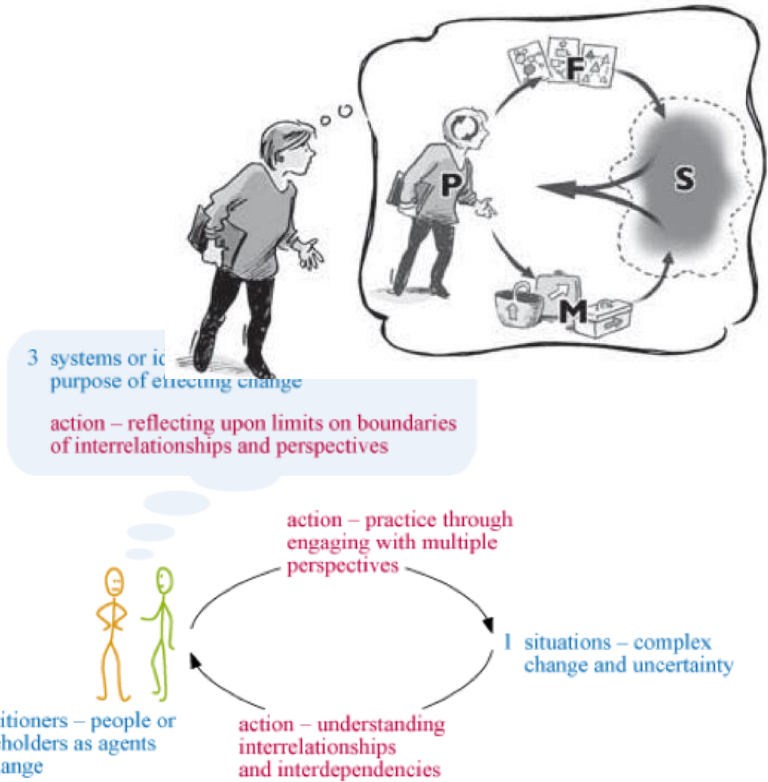

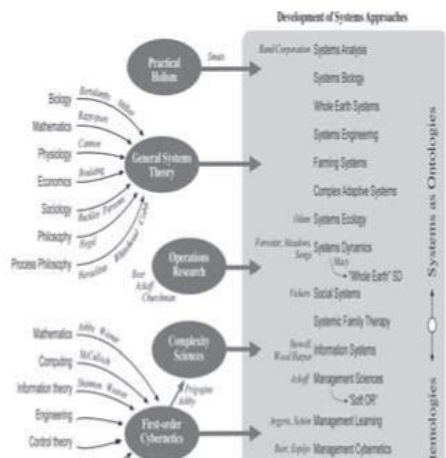

Figure 2.1 Systems thinking in practice heuristic – an approach for strategic thinking

...a range of factors & issues affected learning experience

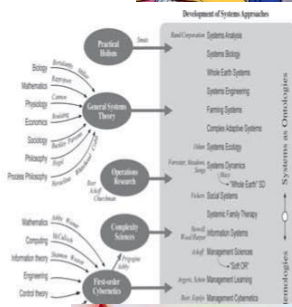

Sense of agency

Experience of isolation

Managing workload

Prior experience of systems

Dealing w. variety of materials, media & voices

...a range of factors & issues affected learning experience

Access to situations

Exp. w. self directed learning

Translating philosophical ideas into practice

Gaps in getting feedback

Orientation towards online learning

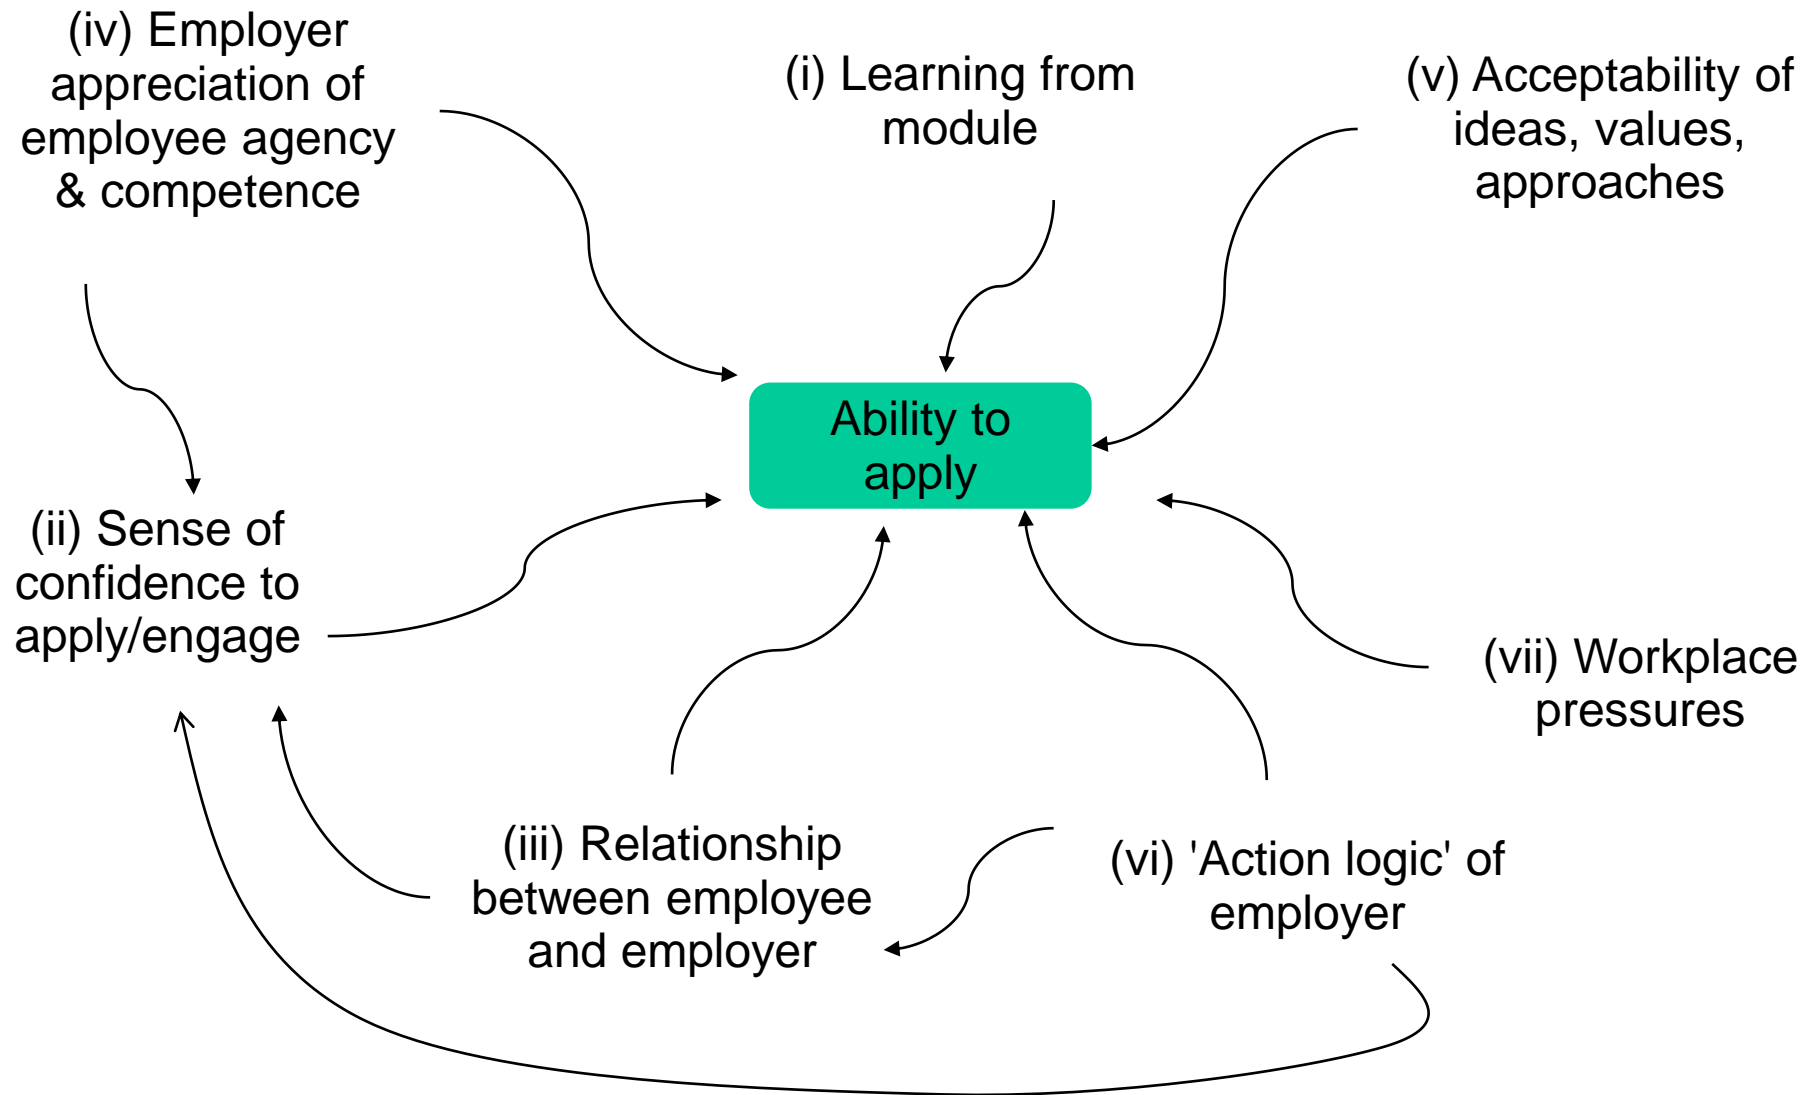

# Archetypes of Systems Learning

- Teach me tell me
- MBA ready
- Get the diploma and make hay
- Geoffrey Vickers 'lite'
- Naked systems thinkers

# Experience of Applying

# Factors affecting application

# Bridging the Gap between teaching, learning and applying

## **During study – joining up learner support**

- Supporting variety amongst learners?
  - Use of archetypes?
- Methodological purism amongst advocates?
  - Developing sense of systems practice as 'bricolage'?

# Bridging the Gap between teaching, learning and applying

## Outside study - shaping landscapes

- Working with employers
  - Provide coaching for employers?
  - Develop better evidence and cases of practice?
- Supporting systems alumni?
  - Promoting action learning amongst alumni
  - Come out from under the radar? Or maybe stay hidden?
  - Professionally recognition? Competency Framework?

# Bridging the gap in my own practice

- I don't need to tell everyone its systems thinking
- Make simple offers simply
- Share thinking tools with generosity
- Learn and support systemic practices and systemic being in others
